WAREMA conservatory awnings

The new space in your home

Do you want to be able to spend the whole year relaxing in your conservatory and enjoying the view of nature?

With Climara conservatory awnings you can feel good all the time, while being perfectly protected from the sun when necessary. We offer optimal sun shading, visual privacy and glare control tailored to your requirements – whether for classic conservatories, individual architectural solutions with large glass surfaces or patio roofs. Thanks to the variety of designs, colours and many extras, you can design your sun shading system to perfectly fulfil your wishes.

Transform your home into your own feel-good oasis with WAREMA!

Climara conservatory awnings, over-glass

The best protection from the heat

Do you love nature, your garden and being out in the fresh air? And do you want to experience the four seasons for yourself? Roofed patios and conservatories can help make this a reality. In creating your own unique, personal space, they extend your living area and offer you a panoramic view outside, while also letting in natural daylight. In the summer, it is especially important to optimally shade the large glass surfaces of your home to ensure a pleasant indoor climate. The external Climara conservatory awnings have been designed to be resilient and stable. They absorb most of the sun's rays before they reach the glass so that the heat can't make its way inside in the first place. The high-grade awning fabrics not only provide pleasant shading, but they are also design elements with widely observable effects thanks to their various colour options. Because they are made to measure, they even fit into unusually shaped glass facades.

Cubic and round design

Set new design standards with your Climara conservatory awning. Choose between cubic or round product variants to best complement the architectural style of your house.

The cubic design of the internal Climara W10 and external Climara W20 harmonises particularly well with a clean-line building architecture thanks to its rectangular shape.

The round design language of the Climara conservatory awning is universally applicable, making it perfectly suited to the architectural design of any house or conservatory.

Climara conservatory awnings

A pleasant indoor climate guaranteed

Over-glass awnings

The external conservatory awnings are mounted on the roof of the conservatory and deliver particularly effective indoor climate control, absorbing most of the sun's rays before they reach the glass. The result: the heat can't make its way inside in the first place. The WMS sensor system in Climara W20 allows for automatic awning control based on environmental influences. With a Climara over-glass awning, your conservatory is kept a pleasant temperature even on the hottest summer days.

Climara W20	<i>Width</i>	<i>Length</i>	<i>Area</i>
<i>max.</i>	6.5 m	6.0 m	30 m ²

Climara W19	<i>Width</i>	<i>Length</i>	<i>Area</i>
<i>max.</i>	6.0 m	6.0 m	30 m ²

① Cover panel shape

As well as the round cover panel, a rectangular cover panel shape is also optionally available for types W10 and W20

② LED strips

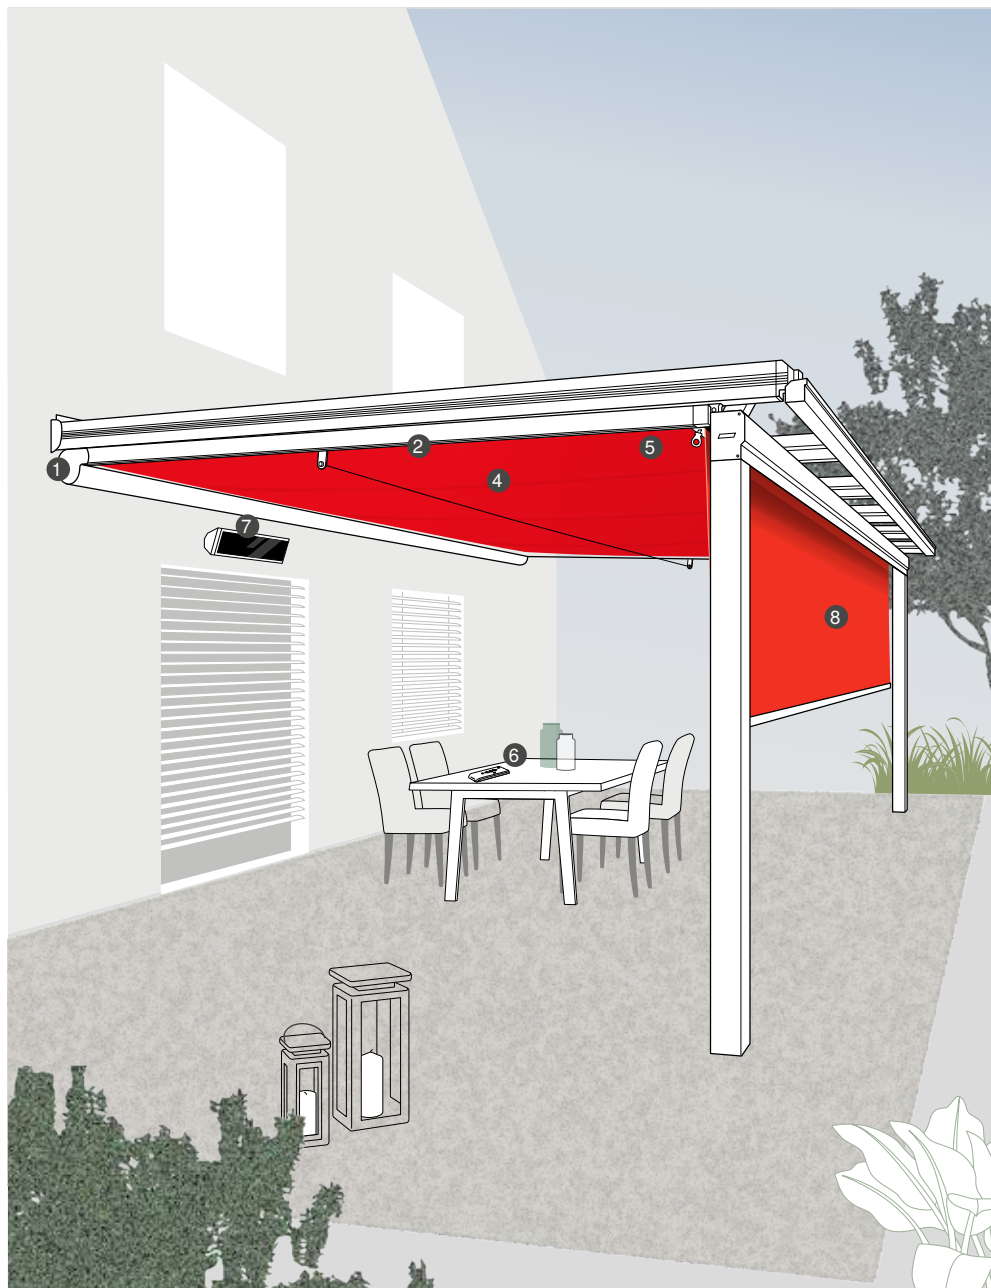

Remote-controllable and dimmable, with integrated LED strips in the guide rails to create the perfect lighting mood (for type W10). Suitable for the W10 with rectangular cover panel shape, an LED strip light rail with rectangular light rail profile can be used on request.

③ WMS sensor system

The WMS sensor system in the Climara W20 provides reliable protection against wind, brightness and precipitation and, for example, automatically retracts the awning in strong winds.

④ WAREMA colour collection

Large selection of colours and designs for the frame and fabric according to your wishes

Under-glass

Under-glass Climara solutions are fitted underneath your patio roof. The internal installation protects the fabric of your conservatory awning excellently against soiling and the effects of weather. This means that under-glass awnings can be optimally integrated into your interior and patio design. Spend your days outside, in your garden, under your protective roof. With the best protection from the sun and many equipment variants and extras available on request.

<i>max.</i>	6.0 m	6.0 m	30 m ²

5 secudrive®-technology

Patented guide system prevents light gaps between fabric and guide rail and ensures excellent fabric tension as well as increased wind load

6 WMS Radio remote control

Convenient operation via hand-held transmitter, wall-mounted transmitter, smartphone or tablet

7 Radiant heater

Infrared quartz technology or Design radiant heater with tinted glass ceramic

8 Valance roller blind

Optimum protection even with low-lying sun, for example, on the west side (possible with models W10 or W9)

Under-glass conservatory awnings Climara

Pure elegance, soothing shade

Under-glass conservatory awnings Climara

Under-glass conservatory awnings Climara from WAREMA are fitted underneath your patio roof and impress thanks to the perfect light protection, glare control and visual privacy they deliver. This means you can continue to enjoy pleasant temperatures inside even if the sun is scorching outside. The attractive under-glass solutions from WAREMA provide dim-out and glare control as needed, and significantly improve your quality of living when in your glazed extension. Now you can also use your conservatory as a workplace or dim the sunlight whenever you like. The premium model Climara W10 also features the patented secudrive®-technology. Secudrive® works by guiding the awning in the rail by a spring steel strip that is directly attached to the awning fabric. The innovative guidance technology keeps the fabric hem taut, meaning unwanted lateral light gaps are now a thing of the past. Thanks to the variety of design variants, colours and many extras, you can transform your conservatory into an oasis of well-being.

Make it your own

Climara for rectangular or trapezoid-shaped glass surfaces

Climara for hipped or sloped glass surfaces

With the Climara conservatory awnings, WAREMA also has the perfect harmonious solution for conservatories with more individual shapes (triangles, trapezoids or hipped roofs), such as the triangular shading type D3. The result: a uniform, modern design.

WAREMA window awnings with easyZIP guidance are suitable as a corner solution for all-glass corners in conservatories. Both sun shading products are connected to each other via a cover panel and drop profile so that they can be raised or lowered simultaneously with just one motor.

The features make all the difference

Feel-good atmosphere with the radiant heater element

For when you want to continue to use your patio after sunset when the temperature drops: the Design radiant heater (2,200 Watts) with tinted glass ceramic allows you to enjoy longer evenings under your awning. The radiant heater can be dimmed to three different levels thanks to the WMS dimming function.

W20	W19	W10	W9	W7	D3

Integrated, dimmable LED lighting

The integrated LED lighting in both guide rails can be individually regulated thanks to the WMS dimmer. From bright light to atmospheric ambient lighting, lighting variations for cosy summer evenings and winter nights are all possible.

W20	W19	W10	W9	W7	D3

The optional valance roller blind

The valance roller blind provides protection against low-lying sun and prying eyes from outside. Depending on the awning type, the valance roller blind can be operated by crank or conveniently with a WMS Hand-held transmitter.

WMS radio system and WMS WebControl pro

The integrated WMS radio remote control automatically protects the conservatory awning Climara against bad weather. In addition to the hand-held transmitter or wall-mounted transmitter operation, you can also control your sun shading system via tablet or smartphone with the iOS and Android app. WMS WebControl pro provides direct access to your smart sun shading system, no matter where you are: from the comfort of your patio, in the office or even while on holiday.

W20	W19	W10	W9	W7	D3
●	●	●	●	●	●

Intelligent WMS sensor system

The clever WMS sensor provides additional protection for your W20 awning Climara. The sensor system automatically retracts your awning when wind or precipitation set in and automatically extends your awning when exposed to sunlight. Without you having to actively intervene.

Experience exclusive WAREMA Colour Worlds

You can order the aluminium parts of your conservatory awning Climara in more than 200 trendy colours, depending on the model. With an extensive range of colours to choose from, the WAREMA Colour World offers perfect design options for all powder-coated aluminium parts. The powder colours impress with excellent, durable coating quality and intensive colour brilliance.

Smart Home for the entire house

Operate your entire home (sun shading, light, heating and more from different manufacturers) via just one app. This means you always have an overview of all your devices and can comfortably operate them from everywhere, even by voice control – WMS and homee make it possible.

With the modular Smart Home central control unit homee, you can network your home completely according to your personal needs. Even pre-existing WMS products can be easily integrated into a homee network.
